II. FINANCIAL AGREEMENT FOR PER PAGE PROCESSING OF DOCUMENTS

InDxLogic now offers a new feature called the "OCR All Pages" attribute that enables Optical Character Recognition (OCR) for all pages of a document. The "OCR All Pages" attribute is a *folder level attribute*. The default setting for the OCR All Pages attribute is set to "Off". When the "OCR All Pages" attribute is in the default setting (Off), the end user receives OCR data for only the first page. Once the OCR All Pages attribute is activated for your account, you must select the "OCR All Pages" attribute on the appropriate InDxLogic folder to enable this attribute. Thus, a practice can have multiple customizable workflows for a scanning, fax or printer port folder, some workflows that result in *all pages* with OCR data returned, and other workflows (default) that will only OCR the first page.

Enabling the "OCR All Pages" attribute will increase the cost of the document submitted to a folder where the "OCR All Pages" attribute is enabled, by an incremental cost per page. The total cost will be sum of the the base per document price plus an incremental cost for each additional page submitted for OCR. There is no change to the cost of processing a single page document or to the cost of processing a multiple page document when the "OCR All Pages" attribute is in the default (Off) setting for the folder that the document is placed.

Note: Enabling the “OCR All Pages” attribute is the first step in the Explanation of Benefit (EOB) workflow release which is scheduled for general release prior to the end of this year. This workflow will allow a practice to create searchable EOB’s for posting to Practice Management.
