

If you can't measure your costs...

...you can't reduce your costs

In today's economic climate with declining reimbursements and escalating costs, managing cost is more important than ever. Health care organizations just like yours are paying up to \$1.00 per document to index...chances are you have no idea what you are paying today.

Kryptiq's Document Management Suite v 8.4 (formerly Docutrak) with InDxLogic Advanced Auto Indexing makes it easy for organizations to monitor, measure and significantly reduce the costs of document management. Whether your practice is large or small, InDxLogic automation and employee productivity management tools reduces your indexing overhead up to 80%... *so what are you waiting for?*

InDxLogic secure portal views of indexing metrics:

1. View account match data
2. Monitor remaining work in queue
3. Monitor staff productivity reports
4. View batch detail for submitted work

InDxLogic secure portal views allow detailed reporting on all aspects of document indexing. Shown here are only two views. For a complete demonstration of the metric reporting available, please contact sales@indxlogic.com.

InDxLogic and Kryptiq Document Management v8.4 (formerly Docutrak) with InDxLogic Advanced Auto Indexing has the capability to meet all your document management needs. Document Management Suite v 8.4 includes explanation of benefits (EOB) indexing, front-desk scanning and management of documents outside of the Electronic Health Record.

About InDxLogic Corporation

InDxLogic's award winning software provides software and services to automate, data mine, benchmark and standardize the indexing of documents and data to electronic health records providing health care organizations with significant short term ROI, and enterprise wide standardization. InDxLogic is used to structure clinical observation data from unstructured data sources and push this data to the clinical flow sheet, automating HEDIS data and other reporting measures from your paper workflows.

The InDxLogic service platform combines search technology with document indexing and point of indexing data mapping. InDxLogic document image recognition also allows customers to see the content of a document inside of the electronic health record (EHR) without opening the original image file. Use of InDxLogic can reduce indexing overhead costs by 60% within 60 days. Our software application has a small financial and infrastructure footprint, significantly reducing barriers to implementation.

For more information on the company, visit www.indxlogic.com.
