

Inbound Document and Fax Integration into Centricity[®] EMR

Inbound faxes and enterprise report generation represent a large part of the electronic workflow processes of healthcare organizations. Kryptiq's Document Management Suite v 8.4 (formerly Docutrak) with InDxLogic Advanced Auto Indexing makes it easy for organizations to map "touchless workflows" with 100% automation rates from your Biscom[®] inbound fax server, scanner, ultrasound device, xray, Dexa, EMG, Spirometry and any other device that can be configured to a pdf printer port. This workflow effectively streamlines document delivery to the EMR, reducing and managing costs of document management.

Certified Partner
Centricity[®] Physician Office

When it comes to document indexing solutions, InDxLogic and Kryptiq Document Management v8.4 (formerly Docutrak) with InDxLogic Advanced Auto Indexing has the capabilities to meet all your needs. Document Management Suite v 8.4 includes explanation of benefits (EOB) indexing, front-desk scanning and management of documents outside of the electronic medical record.

About InDxLogic Corporation

InDxLogic's award winning software provides software and services to automate, data mine, benchmark and standardize the indexing of documents and data to electronic health records providing health care organizations with significant short term ROI, and enterprise wide standardization. InDxLogic is used to structure clinical observation data from unstructured data sources and push this data to the clinical flow sheet, automating HEDIS data and other reporting measures from your paper workflows.

The InDxLogic service platform combines search technology with document indexing and point of indexing data mapping. InDxLogic document image recognition also allows customers to see the content of a document inside of the electronic medical record without opening the original image file. Use of InDxLogic can reduce indexing overhead costs by 60% within 60 days. Our software application has a small financial and infrastructure footprint, significantly reducing barriers to implementation.
